SOLVING AMERICA'S ENGINEERING NEEDS

## Lake Jackson Waste Water Plant

### Client

City of Lake Jackson, Texas

### Size

Multiple buildings of varying sizes

### Construction date

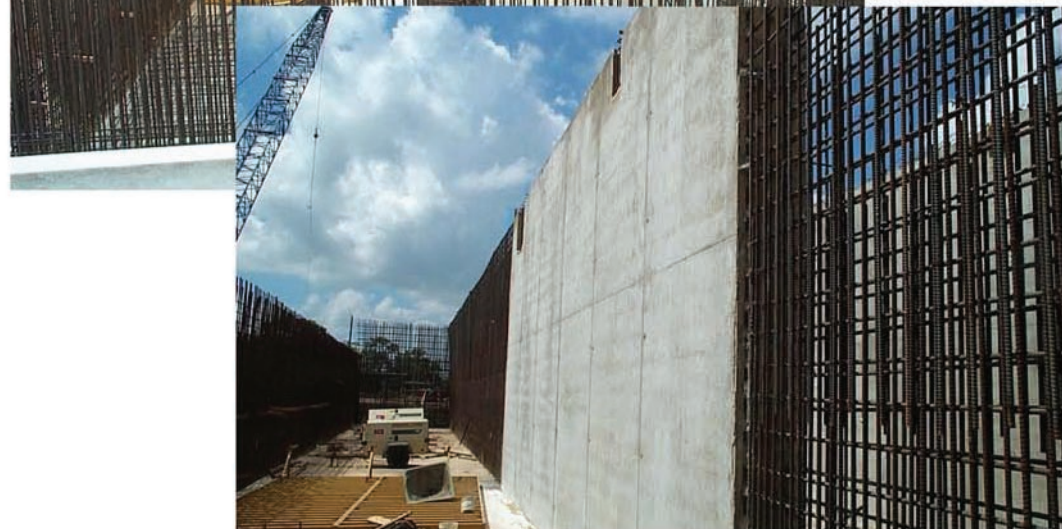

Summer, 2002

### Construction cost

\$12,000,000

### Project Description

This project included all facilities for a six million gallon per day waste water treatment plant serving Lake Jackson, Texas. Facilities included two large clarifiers, an 18-foot deep tank and a new headworks as well as many smaller structures. Paul Engineering also designed a new lab and several other small buildings at the site.
